[Triumph Motorcycles put European Logistics and Distribution Contract out to 3PL Tender](#)

Triumph Motorcycles Ltd are reviewing their current European Motorcycle Distribution operation, which includes delivery direct to the extensive dealership network and

[Is our new warehouse fit for purpose - for the next ten years?](#)

Investment into a New Build Warehouse is always going to be a substantial one, regardless of the prevailing economic climate. It is the longevity of the facility design and the return on investment over time that is important; so how do you know whether you are building the right size facility for your business needs now and in the future?

“Howard Tenens leads Environmental Developments in the Logistics Industry”

Howard Tenens is one of the largest privately owned third-party logistics management groups in the UK; they own and build all their own sites which enable them to provide greater commercial flexibility for their customers.

The group operates 3 million ft² of high quality, modern warehousing across 13 UK locations, employing 500 people, providing distribution, storage and operational solutions to a variety of customers from across the whole business spectrum.

In 2008 Tenens Environmental was set up to focus on initiatives that reduce energy consumption. Significant investment is now being made in technologies that utilise alternative sources of energy and bring environmental and economic benefits. The company has made a commitment to assist all customers to reduce the carbon footprint of storing and transporting their products.

Tenens Environmental will continue to review all new vehicle, waste and environmental technology as it becomes available and adopt where advantageous. The initiatives in which they are involved in partnership with their customers puts them at the forefront of environmental developments within the logistics industry.

Howard Tenens Swindon, the largest of the sites in the Group, is situated on a 25 acre site at Europa Industrial Park in Stratton St. Margaret, is ideally located for the M4 corridor and the M5 via the A419. The site has 24 hour, CCTV manned security and vehicle registration scanning equipment as well as ample parking, vehicle wash, extensive hard standing with vehicle maintenance and recycling on site. The facility is maintained to a high standard by Howard Tenens Group Maintenance Team, based on site.

“At Howard Tenens we have an excellent relationship with all the main ports resulting in quick and easy transportation of containers,” says Ellis Cope – Business Development Director, “Our Europa Park Industrial Estate at Swindon processes in excess of 5,000 containers per year and our port centric logistics operation at the Port of Felixstowe handling over 11,000 per year, makes Howard Tenens the largest single operator at the Port of Felixstowe”

Howard Tenens is the official partner of DB Schenker at their Barking Rail Freight

[Asset Management in The Supply Chain](#)

The key to managing costs of an RTP fleet is the in the initial equipment design and specification, the processes specific to the fleet within the supply chain and having an effective management and control system which can be easily integrated into the existing supply chain operation. The starting point is therefore . . .

“Supply Chain Specialists provide Peace of Mind”

**Testimonial written by Gordon Campbell
Managing Director of Technology Supplies Ltd**

“Technology Supplies Ltd is a leading supplier of Design & Technology and Art products and equipment to schools and colleges throughout the UK and overseas.

As a result of the rapid growth of the Company, we are in the advanced planning stages for an investment in a modern new purpose built facility incorporating our sales, administration and warehouse functions. Our biggest concern related to the size of the new facility and whether the proposed building would be sufficient to cater for the projected strong growth over the next defined number of years. Particularly pertinent was the required size of our logistics operation taking into account the seasonality of the business.

We appointed Gideon Hillman Consulting to carry out a detailed review and assessment of our planned new facility to ensure that it was fit for purpose and met our needs in terms of the planned organic growth.

We were extremely impressed with the professionalism of Gideon Hillman Consulting and depth and analysis of the overall review and assessment. Every stage of the ‘hands on’ review was discussed and we were kept updated on progress of each key element of the consultancy process. The final presentation and proposals exceeded our expectations and provided us with a comprehensive overview of suggested layout designs, material flow routes, storage system options and projected equipment costs. More importantly it has provided us with the ‘peace of mind’ that the proposed new facility enables us to optimise space utilisation and meets our requirements in terms of anticipated organic growth.

The Gideon Hillman Consulting proposals will be incorporated into the design of the new facility as we move forward with this major project during the next 12 months. Their review and assessment of our logistics operation has brought
